Summary

Junior SOC Analyst with a strong foundation in Security Operations, networking, Windows/Active Directory, threat detection, and incident investigation. Knowledgeable in SIEM, EDR/NDR/XDR, IDS/IPS, DNS security, phishing analysis, authentication attacks, and incident response. Familiar with MITRE ATT&CK and Cyber Kill Chain frameworks, with hands-on experience through SOC labs and security simulations. Seeking an entry-level SOC/Cybersecurity role in a blue-team environment.

Education

Bachelor's Degree – Electronics & Communication Engineering (MIU)

Graduation project grade: A

GPA: 3.18

Technical Skills

Security Operations: SIEM, IDS/IPS, EDR, NDR, XDR, Incident Response, Alert Triage, Log Analysis, Threat Detection

Networking: CCNA Knowledge, TCP/IP, OSI Model, TCP/UDP, DNS, DHCP, HTTP/HTTPS, Routing & Switching, VLANs, NAT, VPN, Firewalls, Wireshark, Cisco Packet Tracer

Threats & Attacks: Phishing, Brute Force, Ransomware, DoS/SYN Flood, DNS Attacks, SQL Injection, XSS

Frameworks: MITRE ATT&CK, Cyber Kill Chain

Tools: Linux, Cisco Packet Tracer

Hands-On Experience

SOC Analyst Training – Self-Directed Labs | 2026

- Investigated phishing emails and analyzed indicators including senders, headers, URLs, attachments, and authentication results.
- Analyzed authentication logs to identify failed/successful login patterns and investigate potential brute-force attacks.
- Investigated IDS/NDR alerts and correlated network activity with endpoint and authentication data.
- Applied MITRE ATT&CK techniques to simulate attack scenarios and documented investigation findings.
- Practiced SOC alert triage, severity assessment, prioritization, containment, and recovery workflows.
- Investigated simulated ransomware and privilege-escalation scenarios and identified appropriate containment actions.
- Created incident reports and threat-analysis documentation simulating real-world SOC operations.

Training & Courses

- Cisco Networking Academy – CyberOps Associate (Coursework & Labs)
- TryHackMe – SOC Level 1 Learning Path (Hands-on Labs)
- Linux Fundamentals – Hands-on Labs (TryHackMe)
- Cisco CCNA – Networking Knowledge & Concepts
- Networking Basics – CompTIA Network+ Concepts (Professor Messer)
- Linux Administration Certification – Edges Academy

Languages

English – Excellent

French – Basics
